- Software Infrastructure

AHWAZ AHMAD

Internee

Professional Summary

Dynamic and self-motivated AI Automation intern at Ashtex, recognized for exceptional problem-solving and collaboration skills. Proficient in Python and adept at adapting to new challenges, I thrive in both independent and team settings, consistently delivering results while maintaining a friendly and positive attitude

Work Experience Internship

Ashtex Solution July 2024 - Sept 2024
During my internship at Ashtex, I gained hands-on experience in AI automation by working on Python-based scripts to optimize routine processes. I learned how to integrate AI tools to reduce manual effort, improve efficiency, and support intelligent decision-making. This opportunity enhanced my problem-solving abilities and deepened my understanding of how AI can drive practical automation in real-world business environments.

Clarisync July 2025 - Sept 2025
During my internship at Calrisync, I gained hands-on experience as a Full Stack Developer, working on building and optimizing web applications using modern technologies. I developed and maintained both frontend and backend components, ensuring seamless integration and efficient performance. This experience strengthened my problem-solving skills and deepened my understanding of scalable application development and intelligent automation in real-world business environments.
